

INVASIVE PLANTS

Section 4.083

- 17. A strategy for preventing and controlling the spread or introduction of invasive plants listed by the state and county as noxious weeds.*

Page 8 of the Master Plan includes a brief overview of the flora and fauna on the Crook Point site. In addition, there is included with the application a Wildlife Habitat Assessment, an Integrated Pest Management Plan and the Oregon Department of Agriculture's Noxious Weed Policy and Classification System for 2010. As can be seen in these reports, much attention has been given to protect the natural environment of the site.
