

## **FIRE PROTECTION PLAN**

### *Section 4.083*

6. *A preliminary fire safety prevention plan that, at a minimum, includes the following:*
  - a. *Proposed fire prevention measures;*
  - b. *Preliminary location of fire safety area(s) in which resort visitors and residents can gather in the event of a fire, and proposed measures to maintain such areas;*
  - c. *A fire evacuation plan; and*
  - d. *Proposed on-site pre-suppression and suppression measures, which must include equipment during designated period of fire danger. This requirement may be waived if the resort is within a fire district that provides structural fire protection and the fire district indicates in writing that on-site fire suppression is not needed.*

The Crook Point site is within the Pistol River Fire District. Fire hydrants will be located throughout the site as indicated in the infrastructure plans on pages 31 – 37 of the master plan.

A detailed Fire Suppression and Evacuation Plan is included on page 21 of the Master Plan.

Letters from the Deputy State Fire Marshal and the Pistol River Fire Chief are included in this packet.
